

TOOLEX

17. International Fair of
Machine Tools, Tools and
Processing Technology

**Expo
WELDING**

10. International
Welding Fair
ExpoWELDING

14–16 October 2025

International Congress Centre in Katowice

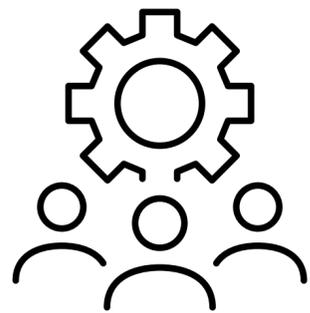

Synergy of Industries

The **TOOLEX** and **ExpoWELDING** trade fairs, taking place on the same date in the International Congress Centre, have once again demonstrated the great synergistic effect of both events. By integrating two complementary industries, we have provided a unique space where participants could familiarize themselves with the latest machine tools technologies and innovations in welding. This synergistic approach is a perfect response to the needs of the market, determining further development of similar events.

We invite you to watch the video from the fair

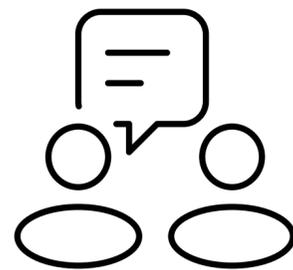

The trade fair in numbers

6 600

industry
experts

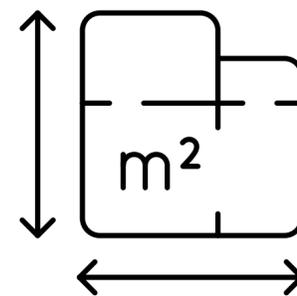

150

exhibitors

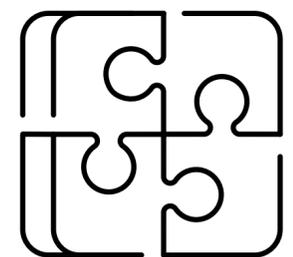

19

countries
represented by
exhibitors

12 000

square metres
of exhibition space

events

Represented Industries

metals processing and tools

welding

other (programming, agriculture, food industry, technical chemistry, oils, bonding technologies, medical industry, pharmaceutical industry)

mining, metallurgy, founding

steel construction, rail transport, pneumatics, robotics

shipbuilding, construction, metrology

defence and aviation

machinery industry, automotive, OHS and maintenance, power, energy and gas sector

FORUM NOWEGO PRZEMYSŁU

14-15 october 2025

New Industry Forum

A two-day debate, the New Industry Forum attracted almost 700 participants, among them many experts managing manufacturing companies and representatives of the world of science. The debate produced conclusions on the current and forecast condition of the Polish industry.

The conference was accompanied by Industry Talks, a series of lectures delivered by experts and managers of major companies implementing modern solutions.

PRZEMYSŁ DLA OBRONNOŚCI

Przemysł dla Obronności (Industry for Defence)

– a first edition of a conference attended by 800 participants: managers of private and state-owned defence companies, scientists, academics, engineers, experts, and decision-makers. This year's edition of the event delivered an important message on the subject of strengthening Poland's resilience and military capability. The experts invited to the discussion agreed on the importance of dialogue between the army, defence industry, state administration, and the scientific community.

Tribologists Seminar

Once again, the TOOLEX trade fair was accompanied by a Tribologists Seminar organized by the Silesian Branch of the Polish Tribology Association. The use of **modern systems and materials used in a rapidly developing economy** was the key subject of the discussion.

The Best of Industry 4.0

The winners of the competition, selected by a jury of experts, received awards at an official evening gala. The statuettes went to outstanding factories and authors of solutions and technologies.

Statuettes in categories “**Factory**” and “**Technology**” were awarded to 9 winners. In the first category, factories of **Wiśniowski**, **Elemental Strategic Metals** (Elemental Group), **Seco/Warwick** and **Tymbark** were decorated.

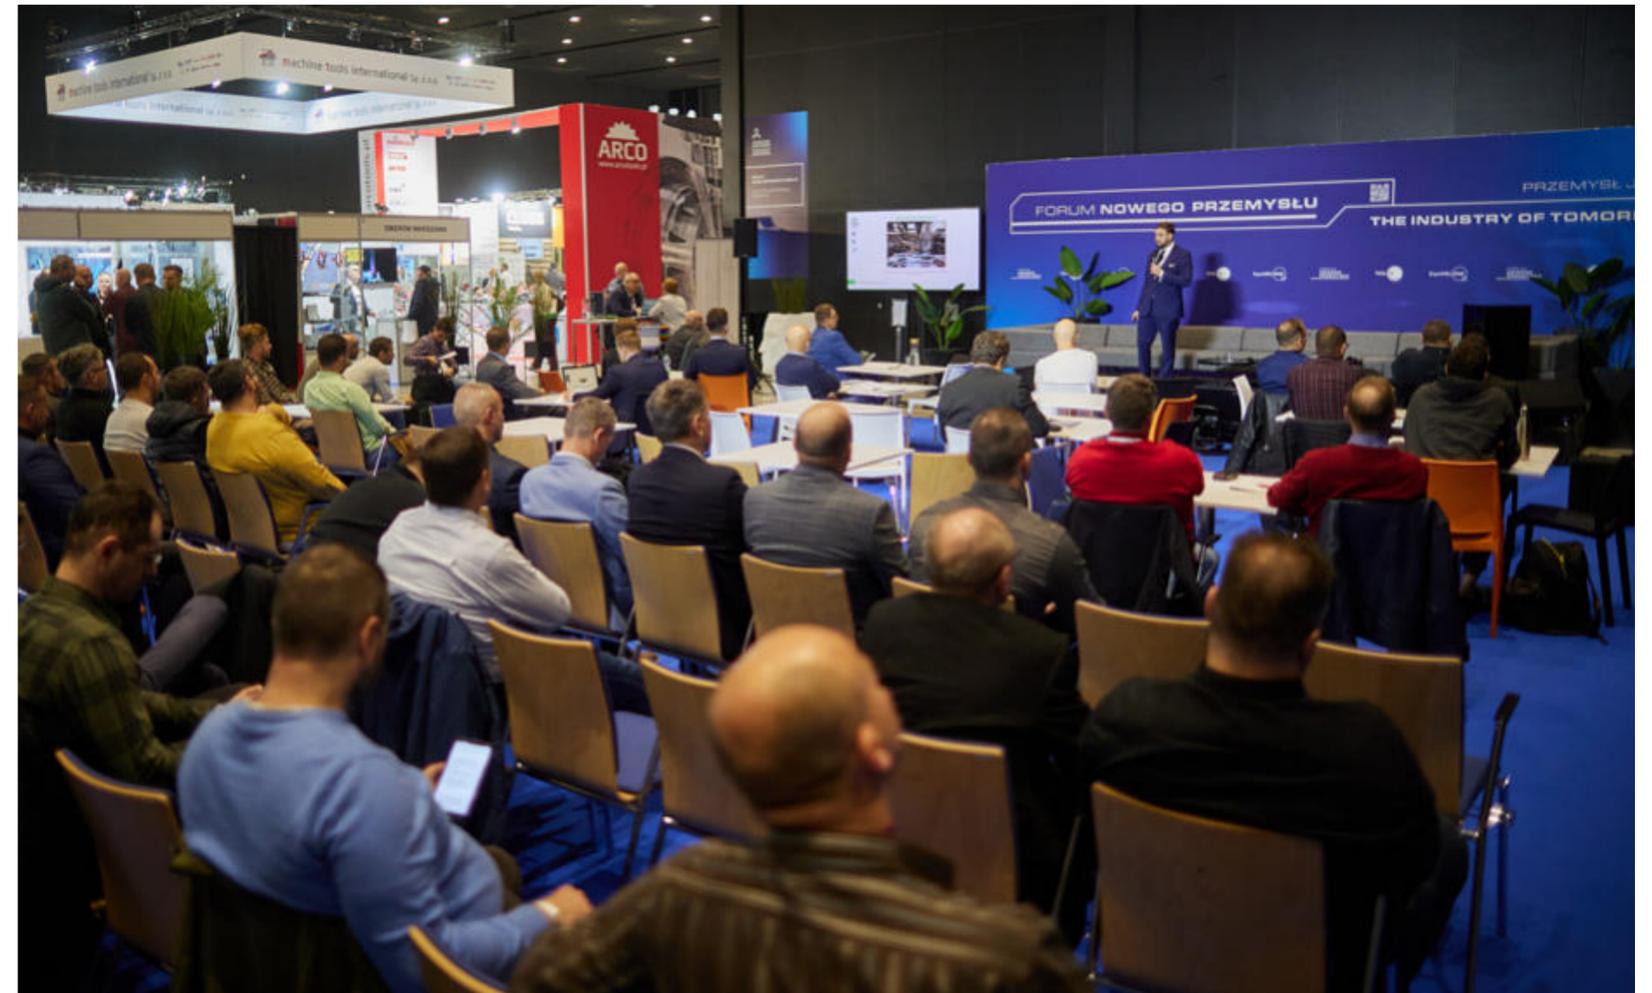

In the category “Technology”, awards went to: **Schneider Electric** for its Agentic AI ecosystem, **Fronius Poland** for a Fortis series of devices, **Dematec Poland** for DNX 2100 technology, **Dassault Systemes** for its 3DEXPERIENCE platform and **BSH** for its Digital Factory solution based on Digital Twin DSH.

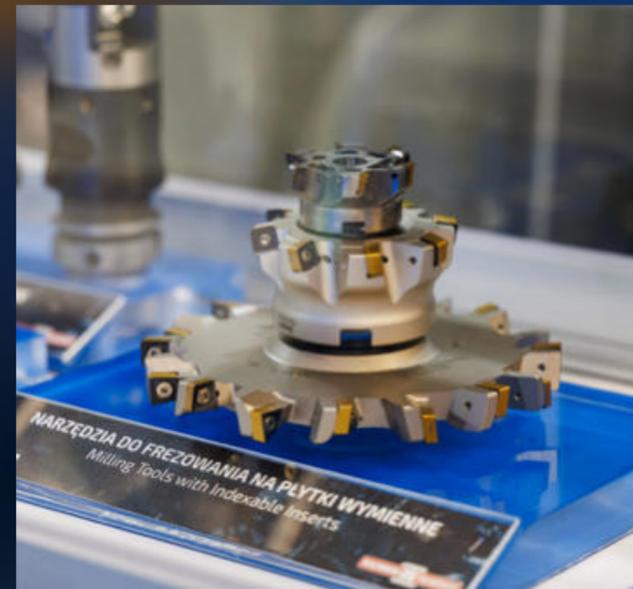

The event was concluded with a banquet for guests of the fairs and participants of the conference.

Welding Seminar

The agenda of the trade fair included a welding seminar titled **“Innovative Technologies in Welding Modern Construction Materials”**. The seminar was organized by **Łukasiewicz Research Network – the Upper Silesian Institute of Technology**.
